Aloha; NASA Aerospace Education Specialist, Tony Leavitt, NASA Ames Research Center, will be in Hawaii in October 2009 for the annual Astronaut Lacy Veach Day of Discovery (October 24). He is available for presentations in classrooms on Oahu on aerospace topics of interest to students, after school teacher workshops, and brings a wealth of experiences and resources to inspire the next generation of explorers.

If you are interested in having Tony provide presentations at your school (no cost), contact art@higp.hawaii for further information to make the request on line.

He is available: November 2, 3, 4, 5, 6 (please note your preferred date when making the request). Already confirmed for the week prior are: Pearl City Elementary, Stevenson Middle, Ahuimanu Elementary, Waipahu Intermediate, Trinity Christian.

If there are any questions, please let me know. Requests will be addressed on a first come, first serve basis. art

AESP: Aerospace Education Services Project

AESP is NASA's longest running K-12 educational project. AESP connects America's space agency with K-12 education throughout the United States. Penn State's Center for Science and the Schools is NASA's lead higher education partner for AESP.

AESP education specialists are experienced educators who are broadly knowledgeable about NASA's missions, programs, and educational resources. Education specialists visit schools to deliver teacher professional development and in-class programming in subjects relevant to NASA's missions. AESP is unique as a STEM education project that works "on the ground" in all 50 states and U.S. territories.

Please note that if you are a teacher, you'll need to obtain approval from an appropriate school administrator first.

AESP is committed to supporting other NASA and non-NASA projects to help strengthen pre college teaching and learning.
