Chemistry Section Meeting Announcement

21 November 2009

Chemistry and interested teachers are invited to attend the next HaSTA Chemistry Section meeting. It will be held at LaPietra – Hawaii School for Girls on Saturday Nov. 21st from 10:00 am to noon in Bachman 3, which is the upstairs room of the science building. Parking is anywhere on campus but the upper parking lot gives the easiest access to the science building. Visit www.lapietra.edu for driving directions and a campus map.

This is a great opportunity to meet your colleagues as well as share your favorite lesson, resource, demonstration, program, or new ideas generated from workshops/conferences, or important issues in chemical education. Please let us know if you would like to be placed on the agenda for the sharing part of the meeting as soon as possible.

The featured speaker is Henry Curtis, Vice President, Life of the Land. He will enlighten us on the topic of “Green Chemistry” and suggest ways to incorporate it into the chemistry curriculum.

Refreshments will be served and door prizes awarded. Please let us know if you plan to attend the meeting. Hope to see you there!

RSVP to your Chemistry Section Co-Chairs:

Barbara Rogers brogers.hawaii@yahoo.com

Consuelo Rogers mcr@lava.net
