Hi James,

My name is Adam Boyd. I work in the Education Division at the American Chemical Society. I found your contact information through the HaSTA website. I was wondering if you might be able to help us spread the word to teachers in your area about a free online resource we've developed by including a link to it from your website.

The resource we're trying to help people discover ([www.inquiryinaction.org](http://www.inquiryinaction.org)) is based on a book that we published, and each activity from the book, as well as the entire 470 page book, can be viewed in full text and is available for free download in PDF format. Molecular animations and videos can also be downloaded in Windows Media or Quicktime format.

If possible, would you be able to help us spread the word by including a link to it from your website? Or, if you have other ideas about how we can reach science teachers in your area, that would be very helpful.

While there is no need to respond to this message, please do feel free to contact me if you have any questions. Thanks for your consideration.

Thanks!  
Adam
