Aloha STEM community and educators,

As you may already know, two graduating seniors from Hawai'i will have the opportunity to represent our state as part of the world-renowned National Youth Science Camp in West Virginia's Monongahela National Forest this summer. Nominations are still open to choose our two delegates for the state of Hawai'i and we are hoping you will encourage your students to apply.

The month-long program honors academic excellence in science and promotes scientific leadership through its lecture series, hands-on research, education activities and challenging outdoor adventures. Initiated in 1963, the program encourages America's youth to pursue high-level scientific careers and apply their science, technology, engineering and math (STEM) education skills.

Attached is the application form which is due February 3, 2010. If you have any questions or concerns please email Corrie Heck at corrie.heck@hawaii.gov.

Again, we strongly encourage you to inform 2010 graduating seniors about this once-in-a-lifetime opportunity and hope to see even more excellent candidates from our robotics community.

Mahalo,

Office of Governor Linda Lingle

To All Hawai'i 2010 Graduating High School Seniors

Aloha students,

It is with great excitement that I am announcing an outstanding opportunity for members of Hawai'i's 2010 graduating class of students. In partnership with Governor Joe Manchin of West Virginia, I am glad to announce Hawai'i's participation in the National Youth Science Camp this summer in West Virginia's magnificent Monongahela National Forest.

Two students from Hawai'i who have shown exceptional science and mathematics skills as well as excellent leadership abilities will be selected to attend this rigorous, month-long summer camp as representatives of our state. The camp centers on a lecture series, hands-on research, education activities and challenging outdoor adventures and encourages the youth of our nation to pursue high-level scientific careers and to embrace scientific leadership.

I encourage each of you to apply for this nationally recognized honors program, of which only 100 students nation-wide will participate. Each state will initiate a competitive process to select two delegates and two alternates. Applications and additional details will be made available online at my website, www.hawaii.gov/gov. Hawai'i's delegates will be announced on February 22, 2010.

As you know, STEM (science, technology, engineering and mathematics) education is a major focus for my Administration. I am incredibly proud of Hawai'i's students and hope you will take this opportunity to further your STEM skills which will be a tremendous asset to you regardless of your career choices.

Sincerely,

LINDA LINGLE
