

Chemistry Section Meeting Announcement

All interested science educators are cordially invited to attend.

Please RSVP to Barbara Rogers brogers.hawaii@yahoo.com and/or
Consuelo Rogers mcr@lava.net , Chemistry Section Co-Chairs.

Topic: Is there a better way to learn chemistry?

(This is an opportunity to preview interactive multimedia software for AP Chemistry. It covers a year of college level chemistry and has sections to prepare students for the AP Chemistry Exam.)

Speaker: Dr. Ketan Trivedi, Chemistry Dept., Virginia Tech

Date: June 1, 2010

Time: 1:00 – 2:30 pm

Place: Iolani School, Science Building, Room I-201

Parking: Weinberg Building off Kamoku St.

“Is there a better way to learn Chemistry? Can I really get rid of the

textbook? Can I present an interactive program to my students that produces better results? Is it cheaper as well? Dr. Ketan Trivedi, of Virginia Tech Chemistry dept. has developed a single disk DVD software program that provides the 'YES' to those questions. This summer more than 200 high school instructors, while taking A.P. Chemistry teaching symposia, presented at week long courses sponsored by the College Board, will get to preview and learn about the software. This is your opportunity to see why this product has evoked the following comments from those that present these seminars nationwide. The software covers a full year of college level Chemistry. (no internet connection required)"

"I used the AP Achievement DVD as a teaching tool, resource for students, and source of practice problems in my AP Chemistry class last year. I wanted to tell you that the AP average in my class was the highest in my 8 years teaching AP. I am sure the interactive practice problems helped with their success, since they could work at their own pace and get instant feedback on their work, instead of having to wait for the next class meeting."

Mr. Marty Fossett

A.P. Instructor

Montclair Kimberley Academy

"His chemistry DVD is an innovative product! It could be easily used as a replacement for a thick and expensive chemistry textbook."

David W. Hostage: Science Department Head The Taft School

"The best thing about the General Chemistry v.4.0 DVD is that it is interactive and it promotes independent learning. Students at home or away from the classroom can rely on the DVD as their personal tutor. I have seen students improve their grades after using it." Leticia Colmenares, Ph.D

Associate Professor, Chemistry

Windward Community College

For more information visit the www.t2i2edu.com website and read the hundreds of comments from student users, as well as fellow instructors.
